Education

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering | CGPA: 8.6

Kattankulathur, Tamil Nadu

Aug 2024 – Dec 2028

Sri Chaitanya Junior College

Intermediate (MPC) | 90%

Vijayawada, Andhra Pradesh

Jun 2022 – Apr 2024

Technical Skills

Languages: Java, C, C++, Python

Web Technologies: HTML, Java(Swings)

Databases: MySQL, Oracle

Developer Tools: Git, GitHub, GitLab, VS Code, IntelliJ IDEA

Concepts: OOP, Data Structures, Operating Systems, DBMS, Digital Image Processing

Experience

Hackathon & Competitive Programming Participant

Remote / Various

Developer

2024 – Present

- Participated in more than 4 hackathons, building software solutions under strict deadlines across diverse problem domains.
- Competed in coding challenges involving algorithms, data structures, and problem-solving under timed conditions.

Open Source Contributor

Remote

Developer

2024 – Present

- Contributed to open-source repositories through documentation improvements and code updates using Git and GitHub.
- Collaborated with developer communities by reviewing issues and participating in project discussions.

NPTEL – Java Programming & Operating Systems Certification

Online

Technical Training

2024

- Completed certified courses covering Core Java, OOP concepts, Operating Systems fundamentals, and exception handling.

Projects

Subscription Fatigue Tracker | Python, React.js, Node.js, MySQL

- Developed a smart subscription management platform to track active subscriptions, renewal dates, and monthly spending.
- Implemented analytics and reminder features to help users reduce unnecessary subscription expenses and manage budgets effectively.

SmartAgri AI | Python, Machine Learning, TensorFlow, OpenCV

- Building an AI-powered agricultural assistant for crop disease detection and smart farming recommendations.
- Integrated machine learning models and image processing techniques to identify crop conditions and improve farming decisions.

Student Enrollment Management System | Java, Oracle Database, HTML

- Developed a web-based system to manage student enrollment with create, update, delete, and search functionalities.
- Integrated Oracle Database using JDBC to securely store and retrieve student and course information.

Exam Result Management System | Java, Oracle Database, HTML

- Designed a system to manage student exam results with automated result calculation and record maintenance.
- Implemented JDBC-based database connectivity for accurate storage and fast retrieval of result data.
